

# Digital Indonesia: Challenges and Opportunities in the Digital Revolution

Indonesia is in the grip of a technological revolution. The dynamic capacity of the internet to connect people and transmit information – as well as the evolving nature of devices and infrastructure, owing to digitalisation – has seen new technologies bring rapid change. But who benefits from this revolution? What are its impacts on how people participate in politics? Is digitalisation undermining or deepening democracy? What challenges and opportunities does digitalisation bring for established media, politicians, ordinary citizens and our collective security?

As part of the ANU Indonesia Update held in Canberra, Murdoch University is proud to host the 2016 Mini-Update, a collaboration between the Indonesia Project at ANU and Murdoch's Indonesia Research Programme. Join us as seven Indonesian and Australian researchers take us to the heart of Indonesia's digital disruption.
