Lebeckia Field Walk
A solution for deep sands with low fertility!

Monday 30th March, 2.30pm
Meet at Harrismith – opposite the Hall.

Speakers: Professor John Howieson - Murdoch University, Dr Sofie De Mayer - Murdoch University, Regina Carr - Murdoch University, Tom Edwards - Murdoch University and Neil Ballard, Global Pasture Consultants.

Lebeckia is a new perennial legume suited to deep sandy, low fertility soils. Trials are indicating that Lebeckia will provide year round grazing on acid sandy soils and lift fertility in these soils to allow long rotation cropping.

For more information please call: Danielle Short, SWCC Sustainable Agriculture Project Manager on 9881 0202

This project is supported by the South West Catchments Council, through funding from the Australian Government’s National Landcare Program and the Government of Western Australia.
