Short Course - Fully Online

Quality and Safety in Healthcare

OVERVIEW

The Quality and Safety in Healthcare short course (SHP301) provides a framework for Health Professionals through interactive learning activities. Developed from the School of Health Profession's Postgraduate course in Health Care Management, the short course is offered in six modules. Each module is comprised of a separate quality and safety topic, inclusive of online activities, readings and assessments. Participants have the flexibility of enrolling in just one, some, or all six modules, according to their professional needs and interests.

- The concepts of safety and quality in healthcare
- Errors and adverse events: how systems and humans interact
- Understanding and managing clinical risk: application to healthcare
- Acquired infections, medication errors and teamwork
- Investigating and learning from errors
- Engaging consumers in care
- Quality improvement to enhance care

Students of this fully online course will be provided with support from the Course Coordinator as required to understand the content and to complete the modules. All attendees will be provided with a Certificate of Completion for a successful completing of each module.
