

Friday 3rd and Saturday 4th November 2017

Principles of Arthroscopy for Small Animal Practitioners

Looking to improve your arthroscopic surgery skills?

The Centre for Advanced Veterinary Education (CAVE) at Murdoch University and Karl Storz bring a unique opportunity to advance your arthroscopic surgery skills through a comprehensive 2 day workshop to be held in Perth, Western Australia.

Be guided by world experts as international orthopaedic icon Dr Brian Beale teams with Murdoch University's very own Associate Professor Mark Glyde and Dr Mark Newman to deliver this 2 day workshop.

This course will introduce and develop arthroscopic surgery skills aimed at practicing veterinarians, specialist trainees, and surgical specialists. Through a mixture of lectures, case discussions, and cadaver workshops, participants will gain a sound understanding of arthroscopic surgery as it applies to the companion animal. No prior arthroscopic training is required.

Lectures will focus on the instrumentation required for arthroscopy, the principles of joint entry and triangulation, and diseases of the elbow, shoulder, and stifle that may be treated with arthroscopy. Intensive cadaver workshops will allow practice of arthroscopic surgery of the elbow and shoulder joints with instruction and guidance from experts in the field.

Places are strictly limited to ensure participants receive the greatest exposure to specialist instruction with the opportunity to turn theory into practice.

PROGRAM

Time	Friday	Saturday
8.30am	Arrival	Arrival
9.00am	Introduction and Equipment Principles of elbow arthroscopy: entry and anatomy	Discussion session Principles of shoulder arthroscopy: entry and anatomy
10.30am	Morning Tea	Morning Tea
11.00am	Principles of elbow arthroscopy: entry and anatomy (WETLAB)	Principles of shoulder arthroscopy: entry and anatomy (WETLAB)
12.30pm	Lunch	Lunch
1.30pm	Diseases of the elbow: diagnosis and arthroscopic management	Diseases of the shoulder: diagnosis and arthroscopic management Diseases of the stifle: diagnosis and arthroscopic management
3.00pm	Afternoon Tea	Afternoon Tea
3.30pm	Arthroscopic management of elbow disease (WETLAB)	Arthroscopic management of shoulder disease (WETLAB)
5.00pm	Close	Sundowner

Speaker profile

Dr. Brian Beale is a board-certified surgeon with Gulf Coast Veterinary Specialists in Houston, Texas (www.gcv.com).

Dr. Beale attended the University of Florida where he studied engineering before graduating Summa Cum Laude with his veterinary degree in 1985. Dr. Beale completed a rotating internship in small animal medicine and surgery at Friendship Hospital for Animals in Washington D.C. in 1986 and a 3 year residency in small animal surgery at University of Florida in 1990. Dr. Beale joined the faculty of the University of Florida College of Veterinary Medicine as an assistant professor from 1990–1992 where he developed research and clinical interests in orthopedic and neurosurgery. Dr. Beale became board-certified by the American College of Veterinary Surgeons in 1991 and joined Gulf Coast Veterinary Specialists in 1992. Dr. Beale has a special interest in arthroscopy, minimally-invasive surgery, fracture repair, joint replacement, treatment of arthritis, and pain management. Dr. Beale has authored many book chapters and scientific articles. He is also a coauthor of two veterinary textbooks - Small Animal Arthroscopy and The Pet Lover's Guide to Canine Arthritis and Joint Problems. He is co-editor of the new textbook, Minimally Invasive Fracture Repair (Vet Clinics of North America). Dr. Beale was awarded the Specialty Veterinarian of the Year Award by the Texas Veterinary Medical Association in 2010.
